

# Mike Miller

Loves to design, prototype, and build digital products with intuitive interactions, delightful animations, and pleasant visuals!

## Choice

Mar 2021 — Now

### Head of Design + Head of Mobile Engineering

Designed a new mobile first product based on some existing loose branding, current usage metrics and understanding about the cryptocurrency investment industry. Engineered the mobile app in Flutter to help structure a small lean team. Hired new talent and lead a design and engineering team. Helped refresh the brand, rearchitected the backend, and reorganized areas of customer support and client relations. Choice manages \$20~ billion in client retirement accounts.

## Strong Skills

Complex native mobile UI from scratch, Designing and Engineering end-to-end products, Kotlin, Swift, Typescript, Dart / Flutter

## Education

Self taught with passion! Naturally curious about creating ideas and how things work

## Ovenbits

Mar 2018 — Mar 2021

### Lead Mobile Engineer

Created apps that were used by millions of users on iOS and Android! Some of our amazing clients were: Lorel, Hanzo Shear Company, YouVersion, and several smaller companies. This role involved lots of custom UX engineering, the occasional design, leading junior teammates, and working with clients to solve the problems they needed within quality constraints.

## Elevator Up

Feb 2017 — Dec 2017

### Product Designer + Front-end Engineer

Designed and developed the front-end for an app that organized hundreds of millions of analytic events and records. After leaving, decided to take some time off to snowboard for a winter.

## Extras

Always building a new exciting new company, loves snowboarding and mountains!

## Sportsman Tracker

Nov 2014 — Feb 2017

### UI/UX Designer + iOS & Android Engineer

Redesigned iOS and Android apps with insight from user metrics and user testing, rewrote the entire iOS app in Swift, helped grow the user base to 600,000+, and built a new community for hunters and fishermen! Worked with Build Variants and Flavors, Realm, Alamofire, Retrofit, Mapbox and more.

## North Sea Studios

June 2013 — Nov 2017

### Designer + Front-end Developer

Empowered small businesses and individuals with custom websites. One ecommerce site that was redesigned helped the owners reach a global audience and increased their sales many times over!
